

# Birds of Prey Northwest

## Our Mission

### EDUCATION

We promote stewardship and conservation of raptors through educational programs with live birds of prey.

### RESCUE

We provide rescue and rehabilitation to injured and orphaned birds of prey with the ultimate goal of returning them to the wild.

### RESEARCH

We also collaborate with others engaged in ongoing raptor research projects.

An opportunity awaits you to get involved by taking personal responsibility to care for our natural resources. Bring an educational experience to your community or become a member today!

# Teaching Opportunities

Birds of Prey Northwest expands teaching moments at every opportunity. Sponsor an event for an organization, school, family, or child that will leave a lasting impression of the concepts of

personal stewardship and responsibility for our natural resources. Volunteer & teaching opportunities abound within our organization.

Call us today to arrange for an educational opportunity.  
(208) 245-1367

Birds of Prey Northwest is a nonprofit 501(c)(3) organization, est. 1993

Our organization depends entirely upon volunteers, donations and grants - it receives no government funding.

## Educational Live-Bird Programs

Bring an unforgettable learning experience to a school or organization

# Silent Hunters

As predators of the night sky, owls are fascinating birds. No creature is built to hunt like the owl. Much mystery and curiosity surround this silent flier. Encounter a Great Horned Owl, a Short-Eared Owl, a Barn Owl and a Barred Owl. Learn why it is wise to “give a hoot” about these nocturnal birds of prey.

# Four Live Programs Available

- Silent Hunters
- Endangered & Threatened Raptors
- Airborne Com
- Fast, Long Wings

## Educational Live Bird Program Fee

Programs in the local area including 5 birds of prey for a 1 hour program are \$350. (No eagle) Programs with 5 live birds of prey that include eagles are \$500.

\*Programs performed outside our local Coeur d'Alene area may incur additional charges for travel expenses.

Schedule today for an unforgettable learning experience with eagles, hawks, owls, falcons and ospreys!

# Airborne Com

Explore the relationships of raptors to one another, their prey, and their habitat. This program presents eagles, hawks, falcons, and

owls to teach ecology, natural history, and raptor biology. How they collide with our modern world lays the groundwork for conservation and personal stewardship.

# Endangered & Threatened Raptors

Top food chain predators are particularly endangered, as many focus on favored prey that may contain high levels of pesticides. In this

presentation learn the history of endangered species and some of the successful restoration efforts and activities designed to protect them. A Bald Eagle, Peregrine Falcon, Barn Owl, and Osprey are presented in this unique program!

Teaching personal responsibility for conservation, ecology and stewardship

Natural history and raptor biology are part of ongoing encounters with birds of prey

Our website serves to educate the public about raptor conservation. Posted research data provides real-time learning opportunities

# Fast, Long Wings

Falcons have long been in the minds and eyes of people throughout history. Egyptians called them gods and ancient oriental falconers harnessed their speed and agility for hunting. Study these special speedy raptors as you meet the insect- and rodent-catching American Kestrel, the magical Merlin, and the fastest animal in the world, the Peregrine Falcon!
